1. Introduction  
 The purpose of this study is to investigate the effects of the independent variable on the dependent variable. The study is designed to explore the relationship between the two variables and to determine the extent to which the independent variable influences the dependent variable. The study is conducted in a controlled environment to ensure the validity of the results.

In practice, as is often forgotten, I carried almost three tons of material down the road, and I am sure that the material for the road was not as good as the material for the bridge. The material for the bridge was not as good as the material for the road.

The first part of the paper is devoted to a discussion of the general principles of the theory of the structure of the atom. The author shows that the structure of the atom is determined by the laws of quantum mechanics, and that the laws of quantum mechanics are in agreement with the experimental facts.

In the second part of the paper the author discusses the problem of the structure of the nucleus. He shows that the structure of the nucleus is determined by the laws of quantum mechanics, and that the laws of quantum mechanics are in agreement with the experimental facts.

The third part of the paper is devoted to a discussion of the problem of the structure of the molecule. The author shows that the structure of the molecule is determined by the laws of quantum mechanics, and that the laws of quantum mechanics are in agreement with the experimental facts.

The fourth part of the paper is devoted to a discussion of the problem of the structure of the crystal. The author shows that the structure of the crystal is determined by the laws of quantum mechanics, and that the laws of quantum mechanics are in agreement with the experimental facts.

The fifth part of the paper is devoted to a discussion of the problem of the structure of the liquid. The author shows that the structure of the liquid is determined by the laws of quantum mechanics, and that the laws of quantum mechanics are in agreement with the experimental facts.

The sixth part of the paper is devoted to a discussion of the problem of the structure of the gas. The author shows that the structure of the gas is determined by the laws of quantum mechanics, and that the laws of quantum mechanics are in agreement with the experimental facts.

The seventh part of the paper is devoted to a discussion of the problem of the structure of the plasma. The author shows that the structure of the plasma is determined by the laws of quantum mechanics, and that the laws of quantum mechanics are in agreement with the experimental facts.

The eighth part of the paper is devoted to a discussion of the problem of the structure of the solid. The author shows that the structure of the solid is determined by the laws of quantum mechanics, and that the laws of quantum mechanics are in agreement with the experimental facts.

The ninth part of the paper is devoted to a discussion of the problem of the structure of the liquid crystal. The author shows that the structure of the liquid crystal is determined by the laws of quantum mechanics, and that the laws of quantum mechanics are in agreement with the experimental facts.

The tenth part of the paper is devoted to a discussion of the problem of the structure of the superconductor. The author shows that the structure of the superconductor is determined by the laws of quantum mechanics, and that the laws of quantum mechanics are in agreement with the experimental facts.

## French Speaker Discusses Politics

The topics of discussion at Le Cercle Français, George Washington High School, Tuesday, Nov. 8.

Madame Guiberteau, French teacher at Garland Country Day School, discussed the political situation in France and the De Gaulle regime. She stated that France needs De Gaulle very much and that if anything should happen to him, there would be a possibility of civil war. The United States, which now has 150,000 students in France, would stand to lose a key ally.

### De Gaulle Discussed

De Gaulle, the President of France, who held a people's vote, is not supported by the French. In which he obtained a 60% majority of the vote, was whether the president of France should be elected by a direct vote of the people or by the electoral college as it stands now. De Gaulle believes a more efficient system is the direct vote.

In another referendum, decided the fate of Algeria, De Gaulle granted freedom for Algeria by an 87% minority. Many French

students, who are participating in "Operation Amigo," an experiment in understanding sponsored by Scripps Howard Newspapers.

These 20 students (17 boys and 13 girls), are dispersed among the eight Denver public high schools. They will live, work and play with the students of the various schools they are attending. They will be leaving Nov. 25 according to Mrs. Elizabeth Munich, Spanish teacher at GW.

While at GW the students will be hosted by Spanish speaking Patriots.

Organized in 1961, Operation Amigo's purpose is to make friends for the United States in Latin America to offset communist efforts there.

The Saints, a college band will provide music in the gym from 8 p.m. to midnight.

Bids are being sold this week (Nov. 13-14) for \$2.25.

To make the dance really "backwards" Roger Rudolph, Senior Class president suggested a hall dance, with music piped through the public address system. Mr. Sam Wadman, principal, rejected the idea as "too dangerous," due to glass doors, pillars and slippery hall floors, Roger explained.

Were all looking forward to a TYPICAL backward dance," commented Roger.
